JOURNAL OF ELECTRON SPECTROSCOPY and Related Phenomena

Subject index

Adsorption
Infrared reflection absorption spectra of $Fe(CO)_5$ adsorbed on Au surfaces 85
AES
A protective coating of P–Mo–V heteropoly acid on steel 93
AES: energy calibration of electron spectrometers. III — General calibration rules 197
Appearance potential spectroscopy
New aspects of the deexcitation mechanism in Auger electron appearance potential spectroscopy 255
Argon L–MM Auger spectra
Transition energies and relative intensities of the Ar $L_{2,3}$–MM diagram Auger lines: a high-resolution study 235
Asymmetric kinematics
(e,2e) Spectroscopy of solids with improved energy resolution 65
Au(111) surface
Infrared reflection absorption spectra of $Fe(CO)_5$ adsorbed on Au surfaces 85
Auger branching ratios
Transition energies and relative intensities of the Ar $L_{2,3}$–MM diagram Auger lines: a high-resolution study 235
Auger electron spectroscopy
AES: energy calibration of electron spectrometers. III — General calibration rules 197
Auger electron spectroscopy study of the electronic structure of porous silicon–metal interfaces 159
Auger energies
Transition energies and relative intensities of the Ar $L_{2,3}$–MM diagram Auger lines: a high-resolution study 235
Auger line
Low kinetic energy AED: a tool for the study of Ge epitaxial layers grown on Sb-terminated Si(111) surface 137
Auger spectroscopy
Transition energies and relative intensities of the Ar $L_{2,3}$–MM diagram Auger lines: a high-resolution study 235
Auger transition
The predicted influence of relativistic effects on the $KL_1L_2(^3P_0)$ Auger transition intensity of thulium proved 181

Back-donation
Intramolecular orbital interactions in 9,10-disilatriptycene studied by photoelectron spectroscopy 165
Background subtraction
Background subtraction from transition metal 2p XPS by deconvolution using ligand atom XPS: study on first transition metal cyanide complexes 31
Binding energies
Systematic X-ray photoelectron spectroscopy and theoretical studies of disulfides of groups IVB, VB and VIB transition metals 45

Calibration
AES: energy calibration of electron spectrometers. III — General calibration rules 197
Carbonyl compounds
On the initial and final state rules for predicting near-edge X-ray absorption intensities 209
Cascade process
Cascade multiplication of strongly non-equilibrium charge carriers in metals by low energy electron excitation 21
Chemical reaction
Photoemission study of Gd metal overlayers on a GaAs(110) surface 77
Cluster model
Theoretical and experimental studies on the electronic structure of M_2O_3 (M = Ti, V, Cr, Mn, Fe) compounds by systematic analysis of high-energy spectroscopy 9
CO chemisorption
Improved resolution in HREELS using maximum-entropy deconvolution: CO on $Pt_xNi_{1-x}(111)$ 1
Combined electrostatic spectrometer
The predicted influence of relativistic effects on the $KL_1L_2(^3P_0)$ Auger transition intensity of thulium proved 181

Computation
Accurate density functional calculation of core electron binding energies. Part V: application to nitriles. Model molecules for polyacrylonitrile revisited 227
Configuration interaction
An experimental investigation of the relativistic effects on the $KL_1L_2(^3P_0)$ Auger transition rate of ^{131}Xe 259
Core levels
Accurate density functional calculation of core electron binding energies. Part V: application to nitriles. Model molecules for polyacrylonitrile revisited 227
Core-level BE shifts
Novel mechanisms for core level shifts in organic compounds 151

Deconvolution
Background subtraction from transition metal 2p XPS by deconvolution using ligand atom XPS: study on first transition metal cyanide complexes 31
Density functional theory
Accurate density functional calculation of core electron binding energies. Part V: application to nitriles. Model molecules for polyacrylonitrile revisited 227
Dielectric function
Ab initio calculation of the optical and photoelectron spectra of $KNbO_3$ and $KTaO_3$ 121
Diffractograms
Design of an electron spectrometer for automated photoelectron diffractogram imaging over π steradians 99
9,10-Disilatriptycene
Intramolecular orbital interactions in 9,10-disilatriptycene studied by photoelectron spectroscopy 165
DV-DS
Valence electronic structure of uranyl nitrate $UO_2(NO_3)_2{\cdot}2H_2O$ 59

(e,2e) Coincidence
(e,2e) Spectroscopy of solids with improved energy resolution 65
Electron monochromator
(e,2e) Spectroscopy of solids with improved energy resolution 65
Electron spectrometer
Design of an electron spectrometer for automated photoelectron diffractogram imaging over π steradians 99
Electron-impact ionization
Transition energies and relative intensities of the Ar $L_{2,3}$–MM diagram Auger lines: a high-resolution study 235
Electronic structure
Auger electron spectroscopy study of the electronic structure of porous silicon–metal interfaces 159
Experimental and theoretical study of the electronic structure of ion-beam-synthesized substoichiometric titanium carbides 173
Study of the electronic structure of polymeric cubane cluster compounds $Mo_4S_4Cl_4$, $GaMo_4S_8$, and $Ga_4Mo_4S_4Te_4$ by X-ray electron and emission spectroscopy 129
The valence-band electronic structure of clean and Pt-covered $TiO_2(110)$ surfaces studied with photoemission spectroscopy 217
Theoretical and experimental studies on the electronic structure of M_2O_3 (M = Ti, V, Cr, Mn, Fe) compounds by systematic analysis of high-energy spectroscopy 9
Ethyl isocyanide
Determination of the kinetic parameters of the isomerization reaction of ethyl isocyanide using HeI photoelectron spectroscopy 41

Factor analysis
Application of principal component analysis to X-ray photoelectron spectroscopy – the role of noise in the spectra 143
$Fe(CO)_5$
Infrared reflection absorption spectra of $Fe(CO)_5$ adsorbed on Au surfaces 85
Free-electron plasma resonance
1–6 eV optical reflectivity and XPS photoemission measurements of MnSb 193

GaAs(110) surface
Photoemission study of Gd metal overlayers on a GaAs(110) surface 77
Gd metal overlayers
Photoemission study of Gd metal overlayers on a GaAs(110) surface 77
Group theory analysis
Study of the electronic structure of polymeric cubane cluster compounds $Mo_4S_4Cl_4$, $GaMo_4S_8$, and $Ga_4Mo_4S_4Te_4$ by X-ray electron and emission spectroscopy 129

He(I) Photoelectron spectroscopy
Intramolecular orbital interactions in 9,10-disilatriptycene studied by photoelectron spectroscopy 165
HeI photoelectron spectroscopy
Determination of the kinetic parameters of the isomerization reaction of ethyl isocyanide using HeI photoelectron spectroscopy 41

Heteropoly acid
A protective coating of P–Mo–V heteropoly acid on steel 93
High-resolution electron energy loss spectroscopy
Improved resolution in HREELS using maximum-entropy deconvolution: CO on $Pt_xNi_{1-x}(111)$ 1
Hybridization
Novel mechanisms for core level shifts in organic compounds 151

Inelastic electron scattering
New aspects of the deexcitation mechanism in Auger electron appearance potential spectroscopy 255
Inelastic electron-electron scattering
Cascade multiplication of strongly non-equilibrium charge carriers in metals by low energy electron excitation 21
Infrared reflection absorption spectroscopy
Infrared reflection absorption spectra of $Fe(CO)_5$ adsorbed on Au surfaces 85
Initial/final state rule
On the initial and final state rules for predicting near-edge X-ray absorption intensities 209
Intensity anisotropy
Low kinetic energy AED: a tool for the study of Ge epitaxial layers grown on Sb-terminated Si(111) surface 137
Interdiffusion
Design of an electron spectrometer for automated photoelectron diffractogram imaging over π steradians 99
Intermediate coupling
An experimental investigation of the relativistic effects on the $KL_1L_2(^3P_0)$ Auger transition rate of ^{131}Xe 259
Isomerization
Determination of the kinetic parameters of the isomerization reaction of ethyl isocyanide using HeI photoelectron spectroscopy 41

Kinetic transport equations
Cascade multiplication of strongly non-equilibrium charge carriers in metals by low energy electron excitation 21
KLL Auger spectrum
An experimental investigation of the relativistic effects on the $KL_1L_2(^3P_0)$ Auger transition rate of ^{131}Xe 259

Langmuir-Blodgett films
Application of principal component analysis to X-ray photoelectron spectroscopy – the role of noise in the spectra 143
Ligand atom XPS
Background subtraction from transition metal 2p XPS by deconvolution using ligand atom XPS: study on first transition metal cyanide complexes 31
LMTO
Experimental and theoretical study of the electronic structure of ion-beam-synthesized substoichiometric titanium carbides 173
Low energy electrons
Cascade multiplication of strongly non-equilibrium charge carriers in metals by low energy electron excitation 21
Low kinetic energy AED
Low kinetic energy AED: a tool for the study of Ge epitaxial layers grown on Sb-terminated Si(111) surface 137

Maximum entropy deconvolution
Improved resolution in HREELS using maximum-entropy deconvolution: CO on $Pt_xNi_{1-x}(111)$ 1
Microspectroscopy
Test of a zone-plate linear monochromator for small-spot XPS with synchrotron radiation 247

Nitriles
Accurate density functional calculation of core electron binding energies. Part V: application to nitriles. Model molecules for polyacrylonitrile revisited 227
Noise removal
Application of principal component analysis to X-ray photoelectron spectroscopy – the role of noise in the spectra 143
Non-equilibrium electrons and holes
Cascade multiplication of strongly non-equilibrium charge carriers in metals by low energy electron excitation 21

Optical reflectivity
1–6 eV optical reflectivity and XPS photoemission measurements of MnSb 193

Perovskite
Ab initio calculation of the optical and photoelectron spectra of $KNbO_3$ and $KTaO_3$ 121
Photoelectron spectra
Study of the electronic structure of polymeric cubane cluster compounds $Mo_4S_4Cl_4$, $GaMo_4S_8$, and $Ga_4Mo_4S_4Te_4$ by X-ray electron and emission spectroscopy 129
Photoemission
1–6 eV optical reflectivity and XPS photoemission measurements of MnSb 193

Ab initio calculation of the optical and photoelectron spectra of $KNbO_3$ and $KTaO_3$ 121
The valence-band electronic structure of clean and Pt-covered TiO_2(110) surfaces studied with photoemission spectroscopy 217
Photoemission spectroscopy
Photoemission study of Gd metal overlayers on a GaAs(110) surface 77
Plasmon decay
Cascade multiplication of strongly non-equilibrium charge carriers in metals by low energy electron excitation 21
Polyacrylonitrile
Accurate density functional calculation of core electron binding energies. Part V: application to nitriles. Model molecules for polyacrylonitrile revisited 227
Polycrystalline surfaces
New aspects of the deexcitation mechanism in Auger electron appearance potential spectroscopy 255
Polymeric cubane cluster
Study of the electronic structure of polymeric cubane cluster compounds $Mo_4S_4Cl_4$, $GaMo_4S_8$, and $Ga_4Mo_4S_4Te_4$ by X-ray electron and emission spectroscopy 129
Porous silicon–metal interface
Auger electron spectroscopy study of the electronic structure of porous silicon–metal interfaces 159
Protective coating
A protective coating of P–Mo–V heteropoly acid on steel 93
Pt/TiO_2
The valence-band electronic structure of clean and Pt-covered TiO_2(110) surfaces studied with photoemission spectroscopy 217
Pt_xNi_{1-x} single crystals
Improved resolution in HREELS using maximum-entropy deconvolution: CO on Pt_xNi_{1-x}(111) 1

Reactor analysis
Application of principal component analysis to X-ray photoelectron spectroscopy – the role of noise in the spectra 143

SCF
Novel mechanisms for core level shifts in organic compounds 151
Schottky barrier
Photoemission study of Gd metal overlayers on a GaAs(110) surface 77
Soft-X-ray photoelectron spectroscopy
Test of a zone-plate linear monochromator for small-spot XPS with synchrotron radiation 247
Solid state
(e,2e) Spectroscopy of solids with improved energy resolution 65
Spatial resolution
Test of a zone-plate linear monochromator for small-spot XPS with synchrotron radiation 247
Steel
A protective coating of P–Mo–V heteropoly acid on steel 93
Synchrotron radiation
Test of a zone-plate linear monochromator for small-spot XPS with synchrotron radiation 247

Through-space interaction
Intramolecular orbital interactions in 9,10-disilatriptycene studied by photoelectron spectroscopy 165
Thulium
The predicted influence of relativistic effects on the $KL_1L_2(^3P_0)$ Auger transition intensity of thulium proved 181
Titanium carbide
Experimental and theoretical study of the electronic structure of ion-beam-synthesized substoichiometric titanium carbides 173
Transition metal 2p XPS
Background subtraction from transition metal 2p XPS by deconvolution using ligand atom XPS: study on first transition metal cyanide complexes 31
Transition metal disulfides
Systematic X-ray photoelectron spectroscopy and theoretical studies of disulfides of groups IVB, VB and VIB transition metals 45
Transition metal sesquioxides
Theoretical and experimental studies on the electronic structure of M_2O_3 (M = Ti, V, Cr, Mn, Fe) compounds by systematic analysis of high-energy spectroscopy 9
Triptycene
Intramolecular orbital interactions in 9,10-disilatriptycene studied by photoelectron spectroscopy 165

Uranyl nitrate
Valence electronic structure of uranyl nitrate $UO_2(NO_3)_2{\cdot}2H_2O$ 59

Valence analysis
Systematic X-ray photoelectron spectroscopy and theoretical studies of disulfides of groups IVB, VB and VIB transition metals 45

X-ray absorption
On the initial and final state rules for predicting near-edge X-ray absorption intensities 209

X-ray electron spectroscopy
Study of the electronic structure of polymeric cubane cluster compounds $Mo_4S_4Cl_4$, $GaMo_4S_8$, and $Ga_4Mo_4S_4Te_4$ by X-ray electron and emission spectroscopy 129
X-ray emission spectroscopy
Study of the electronic structure of polymeric cubane cluster compounds $Mo_4S_4Cl_4$, $GaMo_4S_8$, and $Ga_4Mo_4S_4Te_4$ by X-ray electron and emission spectroscopy 129
X-ray photoelectron spectroscopy
Accurate density functional calculation of core electron binding energies. Part V: application to nitriles. Model molecules for polyacrylonitrile revisited 227
Systematic X-ray photoelectron spectroscopy and theoretical studies of disulfides of groups IVB, VB and VIB transition metals 45
Valence electronic structure of uranyl nitrate $UO_2(NO_3)_2{\cdot}2H_2O$ 59
X-ray photoemission spectra
Theoretical and experimental studies on the electronic structure of M_2O_3 (M = Ti, V, Cr, Mn, Fe) compounds by systematic analysis of high-energy spectroscopy 9
XPS
A protective coating of P–Mo–V heteropoly acid on steel 93
Experimental and theoretical study of the electronic structure of ion-beam-synthesized substoichiometric titanium carbides 173
Novel mechanisms for core level shifts in organic compounds 151
